

ESTEBAN MANRUPE

FULLSTACK DEVELOPER

Persevering, positive, and committed to continuous learning, I am an analytical and goal-oriented developer. Thriving in collaborative environments, I possess strong communication skills and adaptability.

I am currently seeking a frontend position in React or Angular, or a fullstack position involving Node, in order to further develop my skills and expertise in a dynamic and innovative setting that fosters growth and ongoing learning.

If you are searching for a dedicated and skilled developer, I would welcome the opportunity to discuss how my qualifications align with your organization's needs.

WORK HISTORY

Angular Developer

Applaudo, Nov-2022 / May-2023

- Actively contributed to the design, planning, and development of applications, resulting in the successful launch of innovative and user-friendly products.
- Proactively followed up on projects, ensuring their seamless execution and timely completion, resulting in on-time delivery and positive feedback from stakeholders.
- Successfully achieved a score of 9 in the Angular Trainee Program, showcasing exceptional performance and a strong grasp of the program's curriculum.

Operating Support Team Leader

Telefónica Movistar, dic-2016 / mar-2022

- Successfully led a seven-member team, resulting in improved efficiency and productivity within the operating management areas.
- Developed and updated internal websites using React, enhancing UX and streamlining internal processes.
- Implemented effective budget control measures, resulting in cost savings and optimized resource allocation.
- Achieved financial transparency through meticulous tracking and follow-up of management budgets, contributing to better decision-making and overall financial performance.

Electronic Engineering Teaching Assistant

UNMDP, May-2013 / present

- Assist in teaching 'Señales y Sistemas', a second-year subject in the Electronic Engineer career at UNMDP, by providing valuable support to the students.
