

ESTEBAN MANRUPE

FRONTEND DEVELOPER

Frontend Developer with 5+ years of experience building React applications, primarily for US-based clients in remote settings. I enjoy collaborating closely with teams — proactively jumping in where needed, sharing what I know, and sweating the details on UI and UX until things feel just right. Background in Electronic Engineering and team leadership, with active use of AI-assisted development tools (Cursor, Claude, Amazon Q) as part of my daily workflow

TECH SKILLS

< Front-End />

Vanilla JavaScript - Angular - React - Vue
Typescript - Redux - ngRx - RxJS
HTML - CSS - SASS - MUI - Tailwind

< Back-End />

Node - Sequelize - Express

< AI Tools />

Cursor - Claude - Amazon Q

< DB & others />

Git - Github - Gitlab - Bitbucket - Jira
Docker - MySQL - PostgreSQL - Postman

Others

Office - Agile - Photoshop - SAP MM/HR

SOFT SKILLS

- Collaborative by nature — proactive in helping teammates and sharing knowledge.
- Detail-oriented approach to UI, UX, and code quality
- Strong communicator across technical and non-technical audiences
- Adaptable to new tools and workflows

EDUCATION

Henry

Full Stack Web Developer, 2022

Four-month (800 hours) intensive bootcamp

ESIC Madrid

Executive MBA, 2005/2006

Ten-month executive MBA in Madrid

Universidad Nacional de Mar del Plata

Electronic Engineer, 1996/2003

Grade point average: 8.20 out of 10

WORK HISTORY

Senior Frontend Developer

Modernize, Jan-2026 / present

- Resolving UI tickets as part of a large-scale project spanning 6 cross-functional teams, ensuring high-quality frontend delivery.
- Took on additional responsibilities as UI Specialist, designing and building shared components adopted across the entire project.

Frontend Developer

The Tapping Solution, Dec-2024 / Dec-2025

- Led frontend development of a greenfield web app, porting a production iOS/Android product to React + TypeScript.
- Collaborated directly with backend team validating API contracts, ensuring correct data flow and rendering across all screens.
- Integrated multiple third-party services including RevenueCat & Stripe, Algolia, and Amplitude & Braze (analytics).
- Built scalable UI components using Tailwind, MUI, Zustand, and React Hook Form, maintaining code quality with Jest and Yup.

Frontend UI Developer

Digital Executive, Sep-2023 / Nov-2024

- Worked directly with the UX designer, translating Figma designs into responsive, pixel-perfect React components using Tailwind.
- Collaborated with cross-functional teams to ensure accessibility standards and cross-browser compatibility throughout the app.

React Frontend Developer

Aconcagua Software, Jun-2023 / Ago-2023

- Integrated a biometric recognition system (facial and fingerprint) into a React app, and contributed to a Vue project unifying table styling for visual consistency.

Angular Frontend Developer

Applaudo, Nov-2022 / May-2023

- Developed and maintained Angular applications, contributing to feature development, bug resolution, and timely delivery across multiple projects.

Operating Support Team Leader

Telefónica Movistar, dic-2016 / mar-2022

- Led a 7-member cross-functional team while collaborating with an in-house React developer to build and maintain internal web tools, improving UX and operational efficiency.

Electronic Engineering Teaching Assistant

UNMDP, May-2013 / present

- Over 12 years supporting university-level instruction in Signals and Systems, mentoring students through complex mathematical concepts and developing strong technical communication skills.
